

# SHORT GUIDE

## EDUROAM FOR MACOS

1. If already exists, remove the installed eduroam profile in the system settings under Profiles.

2. Open the eduroam CAT website in the **Safari browser** at <https://cat.eduroam.org/?idp=5217>

Your device should be recognized automatically.

3. Download the profile by clicking on the blue button. Confirm with a click on OK.

4. You can find the profile in the system settings under profiles and install it there.

5. When you are asked, enter your access data (RUBLoginID and password) and install.

The screenshot shows the macOS 'Profiles' settings page. On the left, there is a 'Geladen' section with a blue button labeled 'eduroam®' and '2 Einstellungen'. The main area shows the 'eduroam®' profile for 'Ruhr-Universität Bochum (eduroam)' with a green 'Überprüft' status. Below the profile name, there is a description: 'Netzwerkprofil 'eduroam' von 'Ruhr-Universität Bochum' - bereitgestellt von eduroam®' and 'Signiert GÉANT Association'. At the bottom right of the profile card, there are two buttons: 'Ignorieren' and 'Installieren ...', which are enclosed in a red dashed box.

6. Confirm the installation with your device password.

7. The connection should be established automatically.
